How to Answer a Constructed Response Question

Step 1: State your claim.

Your claim is your answer to the question. Your claim should . . .

- **echo the question. In other words, it should turn the question into a statement.**

Example A: Imagine you are answering the question, “According to the article, what is the best way to eat chocolate?” Your answer should start like this: “According to the article, the best way to eat chocolate is . . .”

Example B: Imagine you are answering the question, “Does the author think it’s ever okay to lie?” If your answer is yes, your answer could start like this: “The author thinks that sometimes it’s okay to lie . . .”

- **include reasoning or explanation. So if you are answering a yes-or-no question, you need to do more than say yes or no—you also need to provide some explanation or reason for your answer. If you are answering an open-ended question, you need to provide a brief summary or explanation of your ideas. Your reasoning or explanation should be one to three sentences.**

Example A: According to the article, the best way to eat chocolate is take your time and enjoy the chocolate with all five of your senses.

Example B: “The author thinks that sometimes it’s okay to lie, if you are lying to make someone feel good and no harm will come from your lie.”

Step 2: Provide text evidence with commentary.

Text evidence is details from the text that support your claim—in other words, details from the text that show why your claim is true.

Commentary is where you explain WHY the text evidence supports your claim. Your commentary should include key words from your claim. Text evidence . . .

- **can be in the form of a direct quotation or paraphrase.**
- **should be cited. In other words, you need to make it clear to the reader where the quote or paraphrase came from. Give the page number and, if it’s not obvious, the author’s name and/or the name of the article.**

Here are two examples of text evidence with commentary:

Example A (using a direct quote): “Before you bite the chocolate, take a moment to look at it,” the author writes on page 5. “Admire its glossy shine. Then lift it to your nose and take a deep inhale. What do you notice?” (p. 5) Here, the author is telling readers to take their time before biting into the chocolate, and to use their senses of sight and smell to enjoy the chocolate.

For more on using text evidence, see Scope’s “How to Use Text Evidence” reference sheet.

Example B (using a paraphrase): According to the author, it's okay to tell your friend you're sure no one at the party noticed the spinach stuck between her teeth, because there is nothing to be done about it now and maybe you can relieve some of your friend's embarrassment (p. 14). Here, the author is saying that it's OK to tell a small lie that makes someone feel better and doesn't do any harm.

Step 3: Write a conclusion.

A conclusion is 1-3 closing sentences that leave your reader with an insightful thought. A conclusion could . . .

- **state whether you agree or disagree with the author's point of view, and why.**
- **state whether you think the author's reasoning is sound or unsound, and why.**
- **tell how the topic you've been writing about connects to your life.**

Here are two examples of text evidence with commentary:

Example A: Perhaps eating chocolate in the slow, thoughtful way the author suggests could lead to a deeper enjoyment of it—but eating chocolate this way would also require an awful lot of patience and self-control!

Example B: Is the author right? I think so. Being completely honest about everything at all times is very likely to lead to some hurt feelings, and why hurt someone's feelings if it's not necessary?
